

# Subnational Environmental Administration Conference

April 26, 2019

This conference will examine the administrative aspects of environmental policy at the subnational level. While national policies get more media and public attention, regional and local governments have much of the responsibility for environmental outcomes. We aim to better understand how subnational administrators succeed or fail in the provision of environmental policy.

## April 26th - Agenda

**9:30-10:15 am** - Jiaqi Liang and Liang Ma  
*"Economic Dominance, Goal Dynamics of Local Governments, and Organizational Environmental Performance"*
